SPOTS ON THE SUN

The Way They Affect Our Source

SHOULD ENTER ANY PORT.

Three machines were in the party, one of which upset, a Ford touring car, being in the rear. In passing another machine, the car was turned out

The return of sun spots is a phenomenon that astronomers always regard with great concern. They came flocking back once in about every eleven years. It takes on the average four and a half years for them to reach a maximum of numbers, when the sun is said to be more or less speckled or

The plan contemplates equipping a constant aircraft, similar to a number already under construction in this country for the British government, with

The children escaped most luckily. The elder Mrs. Reifsnider was bruised and cut about the face and head and also the shoulder and back. The wife was also cut about the head and badly bruised. Mr. Reifsnider, who has but one arm, was severely injured about

ery day, and six and a half years to decline again to a minimum, when for months to succeed the sun's face lies as clean as a polished mirror. Upon the whole the best on the earth, taking its entire surface into account and basing the observations on the temperature of the atmosphere, is about 14 degrees of the Fahrenheit scale lower at sea level maximum than at sea level

Whitened torpedoes of regulation size.
Dropping down at a distance of five miles from the object of attack, the air craft would drop its deadly messenger into the water just as it would have been honched from a destroyer. The impact sets the torpedo's machinery in motion, and it is off at a speed of more than forty knots an hour toward the enemy ship.

Could Attack in Fortified Harbor.
Admiral Fleck believes that the flying torpedo boat would make it possible to attack a fleet even within a

The head, neck and back was in a dazed condition for some time.

The engine was not damaged, while the windshield was smashed and different parts considerably bent.

W. C. T. U. MEETING

—

Annual of Discussions at Atlantic City Convention.

(Contributed)

The regular meeting of the W. C. T. U. was held with Mrs. Swope, East 10th 42d street, 10th floor.

This cannot be wholly due to the darkening of the sun caused by the presence of the spots, since, as Mr. O. G. Abbott of the Smithsonian Institution has shown, the amount by which the temperature is lowered in five times too great to be accounted for in that way.

But there are other ways in which an invasion of a horde of spots on the sun make its effects felt upon our globe. The most conspicuous of these is in connection with the earth's magnetic action.

The earth is a great magnet, and the

undoubtedly correct. The range of the latest navy torpedoes is 10,000 yards, and the new wireless radio type will be effective at 7,000 yards. A "Carried" or "Cruised" type of torpedo, which is a surface aeroplane, the 2,000 pound weight would be taken over before defenses could be set up. The torpedo would not run at altitude safe from gunfire. Once over the bay, the machine would glide down within ten or twenty feet of the water, the torpedoes rudders would be set and it would be dropped to do its work while the aeroplane rose and sped away.

Aeroplane to carry a ton of dead weight have been perfected by several countries. Russia is said to have several that will carry twenty men and the new British air craft probably will have a similar capacity.

Wireless Guide Torpedo.

Delegates were elected to attend the County Convention to be held in Albion, August 30, and plans laid for a large attendance and an enthusiastic occasion.

The report from the Anti-Saloon Convention in Atlantic City had to be concurred but it was gratifying to hear that the Woman's Christian Temperance Union was put by most of the speakers, in the front ranks of temperance work, and Woman's Suffrage was universally conceded to be the greatest aid towards prohibition. The report was warmly received.

one appears to exercise a direct influence upon its magnetic state, the difference varying with the condition of the sun as to spots and flares. When spots are at a maximum, magnetic storms of great violence occur, during which the electro-magnetic excitement of the earth is vividly manifested in the atmosphere by imposing displays of the aurora borealis, and in the earth itself by violent currents which interrupt telegraph and cable communications, and sometimes lead into fire in the form of crackling sparks and electric flames playing about instruments.

Occasionally it has been possible to trace phenomena of this kind to the influence of individual sun spots of unusual magnitude and activity. It

of radio controlled torpedo might be employed, one aeroplane carrying the

torpedoes and another carrying the wireless machinery to control the mine's flight through the water. It is pointed out that Admiral Piate secured patents on such a method of control in 1900 when he was a lieutenant in the navy. They are said to be so broad and far-reaching as to underlie all subsequent development of radio control devices.

"My invention," said the applicant, "is identical by Admiral Piate before the battle of Lantz was fought. . . especially applicable to submarine torpedoes and also mine's it is possible to control the movements of a torpedo without great certainty from the shore, from the water or from the air."

A HAPPY IDEA

Outing Planned for Residents of the County Home.

In order to give the inmates of the old men's and old women's departments of the County Home a pleasant day, John M. Reichen is securing sufficient automobiles to take them all for a trip over the battlefield next Tuesday. It is expected that about 35 or 40 will be able to go and to most of them it will be their first view of the field in many years.

the sun the earth, across a gap of 93,000,000 miles, supposed to be filled with nothing but the invisible and intangible ether.

Exactly how the fire ... all products spots upon the sun, I fear, the western world knows little or nothing about. There is a considerable amount of evidence for saying that such storms as our western tornadoes and the hurricanes of the West Indies and the typhoons of the Chinese seas are far more numerous during the sun's greatest and quietest periods than during the times that the spots are crowding in numbers. It has also been thought that wet and dry seasons are connected in some way with the sun's spot cycle, but on this subject the

Since the aerial torpedo plan was advanced reports have come that German engineers were at work with a

Somehow similar scheme. It is proposed to drop from aeroplanes a torpedo that can be guided by radio impulses during its fall and sent with absolute certainty to its mark.

SOLD AT LAST

East End People Secure Everything
but the Rolling Stock.

Citizens of Abbotstown on Friday purchased the tracks and right of way of the East Berlin Railroad for \$8,000. The following committee consummated the deal, D. E. Brandt, U. I. Glatfelter, Samuel Sowers, and Dr. T. C. Miller. They have not announced their plans.

OPENING DAY

Thousands Attend Service at Penn
Grove and Summit Grove.

But all of these things are really little account in comparison with the great question of the effects produced upon the sun itself. The earth is a speck in the infinite vault of space and we are animated atoms living on the fraction of a moment upon the insignificant speck. Of how great a sequence in the vast scheme of creation is the sun! How little it relates to our ephemeral comforts! If a sun flame should flick on and disappearance from the universe, poorly considered, would be of less importance than that of the minutest drop of water from the ocean. Behold the sun should disappear there would be a star gone from heaven. A part of the universe at least would no longer be.

the divide on the Kuskokwim had no heard of the conflict.

With the usual winter expedition to Hotho the northwest coast of the Gulf of Hotho, the white man and his wife, who had been in the Gulf of Hotho for some time, were in the Gulf of Hotho until reaching the Gulf of Hotho.

It was the first Sunday at both camps and the service were of an interesting character. At Penn Grove sermons were delivered by the Rev. H. Hummelbaugh and the Rev. J. L. Hutchinson. A children's service was in charge of Miss Carolyn Martin, of Washington. The prayer and praise service was in charge of the Rev. F. Showers of Connelieville.

GOOD CHITTY LOOK FOR FACTORIES

Furniture Exhibitions Proving Most Satisfactory for Gettysburg's Industries. Expect to Resume Full Time before Long.

With most favorable results attending the large furniture shows now on in New York and Philadelphia, the latter, a very successful season, is expected at the plants of the local furniture companies. C. J. Schaefer, who just returned from the New York show, and L. J. Darnell, of Williams, and other agents of the two companies, are attending to the business at the eastern and western exhibitions.

Mr. Rosser states that there is a very evident indication of a returning confidence in business conditions generally, and, barring any further war scare, the demand for the product of local companies should be large. "The business situation in the country is rapidly returning to normal, and, as soon as a depression occurs, the Gettysburg plants at once suffer. Business prosperity is an equally felt."

The season plan is now working full time with the exception of having Saturday afternoons off. The Gettysburg show is working on a regular basis, and the exhibitors will be here abouts until full time at all plants will be believed that, in a short while, the show will be at its full stride.

For some months both factories have been working to get out the samples and furniture for the fall trade. The show will continue to operate for months to come. Within the next few days, however, when the styles for the coming year will start to come out, the time will be devoted to getting ready for the coming year. The time which are made about the holidays. There is always a change in furniture styles, as well as in style of dress for the different seasons, and these must be taken into account in making the patterns for such succeeding seasons.

It is likely that the present spring, along straight lines and with little carving, will continue in favor for some time to come. The styles of the years were employed at the local plants in recent years have left room and to some extent the time of the year in its work on woodwork has increased, and there is a feeling for the new lines. It is not likely that the direction of these experts will be needed for the new year.

BLOCK SIGNALS

Main Line Will be Equipped With Safety Signals

President Carl Gray, of the Western Maryland Railway Company, has notified the Public Service Commission that the company will, on or about January 1, equip its main line with the automatic block signals. In accordance with the commission's recommendation based upon an investigation of the recent fatal collision between President Gray said that "Safety First" was the slogan of his company and will be faithfully observed. Work has already begun on the installation of the block signals on the Western Maryland line from Big Point to Williamsport and from Williamsport to Emory Grove. When this work is completed, which will be about the latter part of November, the main line will be equipped with the automatic block signals between Big Point and Williamsport and between Williamsport and Emory Grove. The system will be operated by automatic block signals and will be the most improved design.

DR. WILLIAM C. JACOBS

Widely Known Educator Died Suddenly at his Home.

Dr. William C. Jacobs, superintendent of the Philadelphia schools, and a member of the Philadelphia Board of Education, died suddenly at his home in Philadelphia after a long illness. He was 65 years of age. He spent his early life in the cause of education, the last several years being connected with the Philadelphia schools and rising to the superintendent of the January of the year. He leaves his wife and one son.

TOOK UP SCALES

County Barkeepers Law Requested of Hands of Officials.

Several times it was conducted by Robert W. Wright and Messrs. R. Wright and Messrs. R. Wright, who were the only ones who were found to have five pounds for every hundred of dollars. The law was not to have been a large dispute.

PROPOSE PLAN TO DROP GETTYSBURG

Town would Like to Use Gettysburg and Remove Thrown out of League Their Own Team is Cause of Complaint.

With the express purpose of having Gettysburg and Hanover dropped from the Blue Ridge League in 1916 the Chamber of "Reptons" prepared the following:

"It is a little early to make suggestions for next year but it seems that the Blue Ridge League has been a success and will likely continue to be successful in the order."

"In Gettysburg, Wednesday night baseball, the cash received by our team which is nearly 50 per cent. of the total gate receipts, was \$27.00 and \$20.00. Yesterday in Hanover even less was secured, the amount being \$20.00."

"A team playing in this town rarely carries away less than \$5.00 and often as much as \$10.00."

"It does not seem fair that poor performing teams should support their teams at the expense of a better performing team. Cumberland, Frostburg, and New Market represent the best of the league this spring. They have been seen by now that the brand of the team and will not be to enter next season. Why not make the fans of the poor drawing towns produce or give their teams to the team that at least will turn out to a visiting town tomorrow night?"

"In answer to all this it might be stated that Chamberburg gets the Chamber of Commerce of this town appears on Nixon Field. Gettysburg has won seven of the ten games with the Chamber of Commerce. The Chamber has been a success in the past few weeks and has not lost a game. It is a large crowd. It might be well for the sporting world of "Reptons" to visit Nixon Field and see that the team other than Chamberburg is playing there."

"For its population Gettysburg has the largest average attendance of any team in the league. We cannot speak for Hanover."

WILLIAM MOYER
Mr. and Mrs. Kramer Leave to Attend Funeral.

Mr. and Mrs. Garfield Kramer, of Chambersburg, were called to New Market on Wednesday night by the sudden death of Mrs. Kramer's brother, William Meyer, who died at the age of 30 on Wednesday morning.

MRS. POTTENBERGER
Mrs. Pottenger, wife of Dr. Pottenger, died at the age of 30 on Wednesday morning.

WIFE OF WOLFSON CHERMAN TAKEN BY DEATH.
Mrs. Wolfson, wife of Dr. Wolfson, died at the age of 30 on Wednesday morning.

LAST DAYS AT COPPER MINES

People financially interested know of Gold and Silver being found. Ship to be loaded with finding. Mining Weekly.

Stockholders in the United Milling and Mining Company have been much gratified at the news that a vein of gold was recently struck at the Copper Mines.

The vein was found at a depth of 100 feet, and it is believed that the two minerals will be found in large quantities.

In addition to the main one of the paragraph. Reasons for revoking it, however, the fitness of the applicant, the integrity of the person, the "reputation," the construction of certain acts, their purpose and meaning, are included in the questions to be presented to the candidates for practice by the bar. They were evidently prepared by persons who have completed study of the question and the list is now before the judges for selection. Whose action on it will be.

The Winding Race. It is reported that the "great thing" which is now being done is a new way of showing the way to the church and to the house of prayer. It is by the number of inventions, it is said, that the new way of showing the way to the church and to the house of prayer is being done. It is by the number of inventions, it is said, that the new way of showing the way to the church and to the house of prayer is being done.

INSPECTED ROADS

State Highway Official Say Progress in Satisfaction.

George C. Dinklage, state highway commissioner, and H. R. Wolfinger, assistant engineer in charge of the roads, were in Adams County on Monday to make a complete inspection of the work done on the roads entering Gettysburg.

The trip was made by automobile and all the progress was very satisfactory. Special attention was given by the men to the operations along the Emmittsburg road where they found that satisfactory progress had been made in making of the road.

The work on the Chambersburg road was also very satisfactory, and the work on the road to Littlestown. The reuniting of the roads was very satisfactory, and the work on the road to Littlestown.

The trip home was made over the Harrisburg road and the work on the road to Littlestown was very satisfactory.
